PROFESSIONAL SUMMARY

Android Developer with 5+ years of experience designing, building, testing, and releasing apps on Google Play Store and POS platforms. Skilled in Kotlin, Java, and Flutter, with a track record of leading small mobile teams, improving app stability, and shipping government and enterprise apps end to end.

SKILLS

Programming Languages: Java, Kotlin, Dart

Frameworks: Android SDK, Flutter SDK

Tools & Platforms: Git/GitHub, Postman, Firebase, Google Maps API, Google Play Store API, POS SDKs

Architecture & Libraries: MVVM, MVP, Clean Architecture, Hilt, Dagger, Retrofit, Coroutines, RxJava, Jetpack Compose, Room DB, Firebase Cloud Messaging, Material UI

Languages: English, Hindi

PROFESSIONAL EXPERIENCE

Senior Software Engineer, Maventech Labs Pvt Ltd — May 2022 - Present

Bengaluru, India

- Led a mobile development team of 2-3 engineers.
- Rebuilt the company's CRM app, improving the crash-free session rate from 93% to 99% on Crashlytics.
- Integrated multiple POS and printing devices into the CRM app, including Pine Labs, Mswipe, PhonePe, Pinetree, Omnificent, and Comstore (Africa).
- Integrated the Google Maps SDK across multiple apps using MVVM and MVP design patterns.
- Built and deployed government transit apps from scratch, including KSRTC AWATAR, Ente KSRTC, MeeTickets, and PUNBUS (Punjab Roadways).
- Used Hilt, Dagger, Retrofit, Coroutines, Firebase Cloud Messaging, Jetpack Compose, Room DB, Clean Architecture, and Material UI.

Software Engineer, Mantis Technologies Pvt Ltd — July 2019 - September 2020

Bengaluru, India

- Worked as part of a 5-member mobile development team.
- Released 150+ micro apps to Google Play Store from a single codebase for various bus operators.
- Contributed to multiple bus and cargo booking apps, including iAM GDS, Book Bus Ticket, and Travelyaari.
- Used Dagger, RxJava, Glide, Retrofit, Firebase Cloud Messaging, Room DB, Clean Architecture, Material UI, and RESTful APIs; wrote automated tests.

PROJECTS

Book Auto - Personal Project — September 2023 - Present

Actively used across multiple NIT campuses | play.google.com/store/apps/details?id=com.book.auto

- Built two Android apps: Book Auto (for riders to find auto-rickshaw details and location) and Book Auto Driver (for drivers to register their vehicles).
- Developed the apps in Kotlin with a Node.js and MongoDB Atlas backend.
- Implemented Google Maps integration, Firebase push notifications, Gmail login, and Google Play Store in-app update APIs.

Rent House - Personal Project — August 2023 - Present

Actively used worldwide | play.google.com/store/apps/details?id=com.rent.house

- Built an Android app that lets users search for houses and flats to rent and lets owners list properties for rent; reached nearly 2,000 downloads on Google Play.
- Developed the app in Kotlin with a Node.js and MongoDB Atlas backend.
- Implemented Google Maps integration, Firebase push notifications, Gmail login, and Google Play Store in-app update APIs.

Bluetooth Printer - Personal Project — October 2024 - Present

Used worldwide | play.google.com/store/apps/details?id=com.bluetooth.printer

- Built an Android app for designing and printing receipts, labels, barcodes, and QR codes over Bluetooth, compatible with various Bluetooth thermal printers; reached nearly 2,000 downloads on Google Play.

EDUCATION

Master of Technology, National Institute of Technology, Rourkela — 2020 - 2022

Relevant coursework: Computer Science and Information Security.

ACHIEVEMENTS & CERTIFICATIONS

- Published 9 personal apps under the Play Store developer account "Kaam Ke Apps."
- Ranked 3521 in GATE CS 2020 (score 523) and 8385 in Facebook Hacker Cup 2021.
- Completed the Responsive Web Design certification on freeCodeCamp.
